# Student Studying Habits

- On average, students spend only 12 - 14 hours/week studying (50 % < than students a few decades ago).
- Combining hours studying and in class, students spend  $\approx 16$  % of their time each week on academic pursuits.
- When studying, students on average spend about 1/3 of time studying with peers in social settings that are not generally conducive to learning.
- Students average between 8 - 9 hours / week studying alone (35% spend five or fewer hours per week studying alone).
